

Farm King

Grain Cleaners

Farm King builds two grain cleaner models that are designed to separate the dockage from grain before it gets shipped or stored, this increases profit in a variety of ways. Dockage reduces bin storage capacity and increases shipping costs.

- Models available are the 360 and 480.
- Cleaned grain dries faster and screenings can be used as animal feed.
- Cleans up to 1000 bu/hr with the model 360 and 2500 bu/hr with the model 480.
- Powered by a 1 hp motor (360) or a 3 hp motor (480).
- Two-stage screening process with a larger intake spout for easy filling.
